PICKUP INFORMATION ON OTHER SIDE

Mark Your Calendars Now - No Other Notice Will Be Sent!

Seedling orders are filled on a first come, first served basis. As we have no control over the weather or your choice of planting sites, times or techniques, the SWCD WILL NOT BE RESPONSIBLE for your trees and shrubs after they leave our distribution center. We cannot offer refunds or replacements. All trees and shrubs sold are to be used for effective conservation practices and will not be planted for ornamental purposes. Trees and shrubs sold will not be removed with roots attached for resale. This is in compliance with NYS Sale and Use Tax Regulations, 20 NYCRR, Section 529.2(c).

****EVERGREENS****

Cedar, White (*Thuja occidentalis*)

Pyramidal. Lacy, feathery, light green needles on flat branches. Grows to 60' in loamy, moist soils. Slow grower used for windbreaks, hedges, and wildlife food and cover. This native is also known as "American Arborvitae".

Fir, Balsam (*Abies balsamea*)

A favored Christmas tree due to its aromatic fragrance. Has soft, 1" flat, deep green needles. Native tree with medium growth rate to 75' in cool, moist locations. Also excellent for wildlife food and shelter.

Fir, Concolor (*Abies concolor*)

Also known as "White Fir". Has silver trunk and dense, silver-blue needles with bluish band. Likes rich, loamy soils. Grows to 100'. Easy to care for native that makes a great ornamental specimen.

Fir, Douglas (*Pseudotsuga menziesii*)

Very popular native fir used as Christmas trees, lumber, windbreaks and ornamentals. Grows to 100' in well-drained soils. Holds small, soft, green needles for a long time and shears well. Good resistance to disease.

Fir, Fraser (*Abies fraseri*)

Premier Christmas tree. Grows to 40'. Needs well-drained soils. Intolerant of hot, dry places. Horizontal branches of shiny 1" green needles and gray bark. Slow growing native with a wonderful fragrance.

Hemlock, Canadian (*Tsuga canadensis*)

Has small, soft green needles and cinnamon bark. Grows 70' in well-drained, acidic soil. Native that tolerates shade and moisture. Makes a beautiful hedge with graceful, slender, spray-like appearance. Salt-sensitive.

Pine, Austrian (*Pinus nigra*)

Fastest growing pine. Grows to 60' in heavy clay to light sand soils. Has long, dark green 5" needles in bundles of two. Pollution and salt tolerant. Makes a good Christmas tree and a hardy windbreak.

Pine, Red (*Pinus resinosa*)

Long, soft, dark green needles. Grows to 75'. Very tolerant to sandy, dry, exposed sites. Native tree valued for timber and windbreaks. Excellent for reforestation. Very hardy.

Pine, Scotch (*Pinus sylvestris*)

Grows to 60' in wide range of soils, except poorly drained. Short blue-green needles grow in pairs. Bark becomes orange-brown with age. Well shaped, hardy pine with good needle retention. Great Christmas tree.

Pine, White (*Pinus strobes*)

Shade tolerant native, grows well in variety of soils, except wet, clay. Fast growth to 100'. Long, soft, green needles in bundles of five. Graceful, plume-like crown. Good for timber and Christmas trees. Sensitive to salt and wind-burn.

Spruce, Blue (*Picea pungens*)

Most popular of all spruces. Stiff, 1" needles range from dark green to silver-blue, depending on soil conditions and age. Grows best on moist, rich soils and will not tolerate drier conditions. Prefers full sun. Slow starter, reaching 100' at maturity.

Spruce, Norway (*Picea abies*)

Fastest growing spruce. Has extremely attractive, strong, sweeping branches. Shiny 1" flat needles. Prefers well-drained, moist soils. Grows to 100'. Recommended for windbreaks and screens.

Spruce, White (*Picea gleuca*)

Very hardy native, does well on a variety of soils. Endures heat, drought, and crowding conditions. Grows to 60'. Dense, stiff, light green 1" needles. Good for windbreaks, pulpwood, and Christmas trees.

****DECIDUOUS TREES****

Alder, Black (*Alnus glutinosa*)

With a total growth rate of up to 6' per year, this fast-growing cousin of the Birch family is a great shade or windbreak choice. It prefers moist to wet soils and full sun to reach its potential of 60' high and 20' wide. Its dark, glossy green leaves remain late into the fall. Cone-like fruits appear in late spring. This nitrogen-fixing tree is good for rural and urban areas, wet sites where it provides erosion control, and is adaptable to harsh environmental conditions.

Beech, American (*Fagus grandifolia*)

This native to eastern U.S. grows 50-70' tall and 60' wide. The trunk is short and the branches generally cascade to touch the ground. Glossy two-tone green leaves in spring become very attractive bronze fall color. Flowers in April/May with edible nuts through winter. Prefers full sun in well-drained acidic soil. Shallow, wide root system needs a large open space to spread out.

Birch, Native (*Betula papyrifera*)

Does well in cool, moist locations. Can reach 80'. Oval leaves turn bright yellow in fall. Native tree also known as "Paper Birch" because its snow white bark peels off in paper-thin layers and "Canoe Birch" since it was used by Native Americans to make canoes.

Cherry, Black (*Prunus serotina*)

Fast growth to 60' in various soil types. White flower clusters in May produce edible black fruits. Green leaves turn yellow-red in fall. Native tree used for furniture, firewood, jam, wine, wildlife food source.

Filbert, American (*Corylus americana*)

Also known as "Hazelnut" this large, multi-stemmed native prefers rich, well-drained soils and is pH adaptable. Growing to 8-15' tall, it is shade tolerant. Its long slender 8" catkins produce an acorn-like nut in late September that is enjoyed by humans, small mammals, deer, ruffed grouse and other large birds.

Maple, Red (*Acer rubrum*)

Known for its bright red flowers in early spring. Green foliage turns a brilliant red-orange in fall. Grows fast to 100'. Tolerates wet and swampy to rocky soils. Native widely used for wetland plantings. Great for wildlife habitat.

Maple, Sugar (*Acer saccharum*)

The State Tree of New York, this outstanding native grows to heights of 100'. Does best on well-drained soils. Dark green leaves turn brilliant yellow to fiery orange-red in fall. Used for maple syrup, lumber, firewood, wildlife habitat, or as an ornamental.

Mulberry, Red (*Morus rubra*)

Medium-sized native tree that reaches 60-70' tall. Tiny green flower clusters in early spring change to cylindrical red-purple fruits that are sweet, juicy and ready to eat in summer by both wildlife and humans. Dark green leaves turn yellow in fall. Prefers full sun and moist soils. Wood is used for fenceposts, agricultural implements, furniture and interior finish.

Oak, Pin (*Quercus palustris*)

Excellent tree for both wetland and urban settings. Slender native with fast growth rate to 50-60' in various soils. Will tolerate wetter conditions. Textured, glossy green leaves turn scarlet in the fall. Acorns are enjoyed by wildlife.

Oak, Red (*Quercus rubra*)

Native that does well on sandy to rich, loamy soils. Grows fast to 90'. Lustrous canopy of green leaves turn reddish-brown in fall. Has small red flowers in Spring. Produces 1" acorns. Tolerates city conditions. Excellent for lumber and wildlife.

Oak, White (*Quercus alba*)

A popular native shade tree that grows to 60-80' tall and is about the same in width as it is tall. It has irregular branching and attractive flaky, light gray bark. Rounded, grayish-green 4-8" long leaves become purple-red in the fall. Prefers full sun and acidic soil. Its small 1" acorns are popular with wildlife.

Poplar, Hybrid (*P. deltoides x nigra*)

Extremely hardy. Grows rapidly to 80' on various soils, even in poor conditions. Has wide crown of silvery green leaves. Is used frequently in wetlands and environmental improvement areas.

Sassafras (*Sassafras albidum*)

Aromatic 30-60' tree known for its 4 patterns of unique-shaped leaves. Leaf color ranges from green-yellow in summer to deep orange, scarlet and purple in fall. Grows in moist sandy soils and light shaded areas. Fruits are elliptical shiny, blue-black berries that are devoured by birds. The roots, bark and leaves have a spicy scent, whose oils are used in soaps and for flavoring drinks (sassafras tea and root beer). Its wood is beneficial for barrels, buckets and furniture. Good native planting choice to restore depleted soils in old fields.

Sycamore (*Platanus occidentalis*)

This native tree is fast growing to 75+ feet and has a massive trunk with coarse, mottled bark. It prefers moist soils and full sun. Deep red flowers in late March are followed by tan fuzzy-looking rounded fruit and yellow-brown autumn foliage. Good urban tree. Can be used on difficult sites.

Tuliptree (*Liriodendron tulipifera*)

A native shade tree that grows to 70-90'. Its massive trunk boasts attractive gray bark with fine light gray furrows. Has unique tulip-shaped 5-8" long leaves that turn a showy golden yellow in fall. Blooms beautiful flowers May thru June that also resemble yellow-green tulips with a reddish orange center. Likes full sun but is intolerant of dry sites. Prefers moist, slightly acidic soils.

****DECIDUOUS SHRUBS****

Butterfly Bush (*Buddleia davidii*)

Multistemmed with fragrant 4-10" flowers summer thru fall. Grows very quickly in all types of soil to 8'. Needs heavy pruning each spring to keep under control. Attracts hummingbirds and butterflies.

Dogwood, White Flowering (*Cornus florida*)

One of the best native northeastern, ornamental shrubs. Grows well in rich, moist soils to 40'. Beautiful white flower clusters produce bright red berries in fall. Green leaves turn scarlet.

Elderberry (*Sambucus canadensis*)

Vigorous grower to 12' in any type soil. Multistemmed, with clusters of purple-black fruits in late summer, used for jams and wine. A good native wetland plant. Great food source for wildlife.

Lilac (*Syringa vulgaris*)

Easy to grow, old-fashioned favorite. Masses of fragrant white to lavender flowers and bright green leaves in Spring. Will grow in well-drained soils to 15'. Makes beautiful natural screen spreading 6-10'.

Rose of Sharon (*Hibiscus syriacus*)

Also known as "Althea". Grows in various soils to 12'. Small green leaves with rose-type flowers July to September. Ph adaptable. Upright growth allows for hedging along buildings or as stand-alone ornamental.

Serviceberry (*Amelanchier alnifolia*)

A native to North America, this 6-20' suckering multi-stemmed shrub thrives on moist, well-drained acidic soil and tolerates a wide pH range. White flowers in April produce dark purplish fruits in June. That is how it got its other recognized name of "Juneberry". This shrub is enjoyed by many types of birds. Prune regularly for best fruit production.

Spicebush (*Lindera benzoin*)

A round, native shrub with a slow growth rate to 8-12', it does best in well-drained moist soils in full sun. Its showy early spring, fragrant, yellow flowers appear before leaves and give way to scarlet fruits in September. Finely chopped, the ripe "spiceberries" taste like allspice and make a superb seasoning for compotes and main dishes. Twigs, leaves and berries are also used for teas, to tenderize game, and as compresses for mild skin irritations. Scratch the twigs or crush the leaves to release its lemony-spicy fragrance!

Strawberry Bush (*Euonymus americana*)

This shrub grows 2-6' high in sun to partial shade in moist well-drained soils. Its egg-shaped bright-green leaves turn an excellent dark red in autumn. Tiny 5-petaled, yellow-green-purplish flowers appear in March. Unique fruits are round bumpy capsules, which after maturing, split open to expose bright red seeds taking on the appearance of a strawberry, ripening in September. Also known as "hearts-a-burstin", this native's leaves and seeds are loved by birds and other wildlife. Not to be confused with an edible strawberry plant!

Witch-hazel (*Hamamelis virginiana*)

Small native shrub that has yellow fragrant blooms late into October. Attractive yellow-orange foliage in fall. Great to plant as understory or a border in large yards. Prefers moist soil but will tolerate a variety of conditions. Grows 15-30' in full or partial shade.

****GROUNDCOVERS****

Christmas Fern (*Polystichum acrostichoides*)

This easy to grow dark green evergreen prefers neutral to acid soils. Plant in shade to partial shade. Grows 18" in height and width. Good native to plant for soil erosion on steep slopes.

Fountain Grass (*Pennisetum*)

An upright, mound forming plant 1-3' tall. Prefers full sun to light shade in fertile, moist to well-drained soil. Flowers July through fall, with color changing from whitish purple to coppery purple. Great for erosion control.

Myrtle (*Vinca minor*)

Also known as "Periwinkle". Has shiny green leaves and lilac-blue flowers in spring. This 3-6" high, ground hugging plant grows well in areas where grass won't. Likes well-drained soil. Does best in full to partial shade.

Pachysandra (*Pachysandra terminalis*)

A carpeting plant that has an interesting leaf pattern and inconspicuous white spike flowers. Grows 6-12" high in well-drained soil. Excellent for heavy shade.

****OTHER ITEMS****

Countryside Wildflowers

A 100% pure seed mix of balanced blends of annual and perennial native wildflowers. Good for renovating old pastures, commercial sites and unused portions of lawn. Can be planted on moderate slopes to stabilize soil. Will grow in all soil types, even poor. The better the site, the better the outcome.

Deer Plot Mix

Mix of annuals and perennials that will attract and maintain deer. Includes several ryes, clovers, wheat, alfalfa, timothy, proso millet, birdsfoot trefoil, sainfoin, lathco flatpea, cicer milkvetch, and much more. Also good for birds and rabbits. Annuals provide growth the first year and act as nurse crop for perennials. Plant generously in open fields, along trails, or the edge of woods.

Tall Mix

Contains 20 short and tall varieties of annuals, including sorghums, millets, beans, and sunflowers. Grows 4 to 8 feet tall. Excellent for planting along fence lines, edges of woods, and strips in fields. Attracts pheasant, dove, quail, and turkey.

Fertilizer Tablets

A slow-release pellet 20-10-5 (nitrogen-phosphorous-potash) made specifically for 1-2 year old seedlings. Safe, easy to handle, convenient. Planting instructions included.

RECYCLING FACTS

- Plastic bags are easier to recycle and require less energy to produce than paper bags.
- To produce each week's Sunday newspapers, 500,000 trees must be cut down.
- Approximately 1 billion trees worth of paper are thrown away every year in the U.S.
- Rainforests are being cut down at the rate of 100 acres per minute!
- Americans use 85,000,000 tons of paper a year; about 680 pounds per person.
